

Dear colleague,

Following the communication by the United States Government to prohibit the entry into the US of foreign citizens who have passed through the Shengen territory in the last 14 days, **IBERIA** informs that, at least for the time being, **it maintains its operations between Madrid and the United States.** This will allow the return of American citizens to their country, as well as the return of those Spanish and European clients who are in the US, who have or acquire a ticket and wish to do so.

The regulations of the United States Government allow the entry of our crews, so that the operation can be carried out normally.

We remember the importance of being attentive to the information published in the systems about our operations,
